NAVY SCREEN EDITION

SECTION A · Warm-up

A1 $f(x) = x/8$ for $0 \leq x \leq 4$. Find $E(X)$ and $\text{Var}(X)$. [3]

A2 For the same X , find $E(3X + 2)$ and $\text{Var}(3X + 2)$. [3]

SECTION B · Standard

B1 For $f(x) = x/8$ on $0 \leq x \leq 4$, find the median and the mode, and describe the skew with a justification. [4]

- B2** $f(x) = 3(1 - x)^2$ for $0 \leq x \leq 1$. Find the mean, the variance and the median, and name the skew. [4]

- B3** For $f(x) = x/8$ on $0 \leq x \leq 4$, find $E(1/X)$. [3]

SECTION C · Stretch

- C1** Prove from the integral definitions that $\text{Var}(aX + b) = a^2\text{Var}(X)$ for a continuous random variable. [4]
