

QUESTION WORKBOOK

Modulus, argument and loci

Complex numbers · Year FM

6 questions · 20 marks

PRINT EDITION

SECTION A · Warm-up

A1 Find the modulus and argument of $z = -1 + \sqrt{3}i$. [2]

A2 Write the number with modulus 2 and argument $\pi/3$ in the form $x + yi$, exactly. [3]

SECTION B · Standard

B1 z has modulus 2 and argument $\pi/6$; w has modulus 3 and argument $\pi/4$. Find the modulus and argument of zw and of z/w . [4]

B2 Sketch the locus $|z - 3 - 4i| = 2$, and find the greatest and least values of $|z|$ on it. [4]

B3 Describe the locus $|z - 2| = |z + 2|$ and justify the description. [3]

SECTION C · Stretch

C1 On one Argand diagram, shade the region satisfying both $|z| \leq 3$ and $0 \leq \arg z \leq \pi/2$, and find its area. [4]
